# **How Technology is Used in Work**

Level 1

---

## Notes to the Teacher:

The activities in this booklet are designed to support the topic *How Technology is Used in Work*. You can photocopy, cut out and laminate the picture cards at the back of the booklet and use them together with the picture board in a variety of ways. For example:

- Have the learners practise picture recognition by sticking the cards on top of the identical squares on the board.
- Have the learners place all the cards in front of them. Say a word, and they point to or hold up the corresponding picture card.
- Give a clue, such as ‘we can use this to speak to people who are far away’, and invite the learners to hold up the corresponding card (telephone, or perhaps computer).
- Call out specific categories for the learners to sort and categorise their cards, for example ‘things we have in school’.
- Hold a class discussion on the topic, talking about the picture on each card.
- Use two sets of laminated cards to play matching pairs. Place all the cards face down. Working in pairs, the learners take turns to turn over two cards – if they match, they keep the cards. The winner is the one with more cards at the end.

---

People who work in different places use lots of different things as part of their jobs.

For example, people who work in an office might use a computer, a photocopier and a telephone.

People who work in a shop might use a pricing gun, a cash register and a vacuum cleaner.

What technology does your teacher use in school?

**Draw lines from the things in the centre to the workplaces where you might find them.**
